

Bitdefender GravityZone Business Security

Unified Prevention, Detection, Response and Hardening Across Endpoint, Network and Cloud. Consistently superior protection combined with risk management and vulnerability assessment.

- A single console gives you comprehensive protection for your workstations and servers (physical or virtual).
- Keeps you informed on the risk factors by discovering and prioritizing risky OS and software misconfigurations.
- Blends machine learning and heuristics with signatures and other techniques to offer protection against all types of malware, plus threats such as phishing, ransomware, exploits and zero-days.

Universal security platform for the best breach avoidance suitable for:

- Small Businesses looking for powerfully simple security
- Medium Businesses and Large Enterprise with comprehensive, advance security needs and strict compliance requirements

Diverse range of packages and add-ons include but not limited to:

- GravityZone Business Security - Ideal for smaller businesses looking for easy to manage and affordable endpoint security. It covers file servers, desktops, or laptops, physical or virtual machines.
- GravityZone Advanced Business Security - Comprehensive protection for physical and virtual desktops, servers and mobile devices, security and antispam for Exchange mailboxes – all managed from a single console.
- GravityZone Ultra Security - Integrated prevention, detection, response and risk analytics
- GravityZone Elite Security - Integrated prevention, hardening, risk-, and incident-analytics platform
- GravityZone Enterprise Security - Next-generation security for all enterprise endpoints. Offered a-la carte
- GravityZone Email Security (Add-on) - Multi-layered cloud-based email security solution that offers complete business email protection that goes beyond the traditional threats, stopping modern, targeted and sophisticated email attacks including Business Email Compromise (BEC) and CEO fraud.
- Full Disk Encryption (Add-on) - Operating System native encryption management for Windows and Mac.
- Patch Management (Add-on) -Automatic & fully featured patch management delivered from the GravityZone Console.
